Biophysical Chemistry 51 (1994) 413–417

Biophysical Chemistry

Subject Index to Volume 51 (1994)

Absorption spectroscopy
Factor analysis; Eigenspectra; Real spectra; Constraints; Amphotericin B; Lauroyl sucrose; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Accessibility
Proteins; Residues; Hydrophobicity (Nauchitel, V.V. (51) 327)

Antigen; Antibody; Recognition; Proteins; Residues; Hydrophobicity (Nauchitel, V.V. (51) 337)

Aggregation
Factor analysis; Eigenspectra; Real spectra; Constraints; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Monomer; Oligomer (Chapados, C. (51) 71)

Alkali halide
Ion pair potentials-of-mean force; Water (Pratt, L.R. (51) 147)

Alkane
Solvation free energy; Surface tension; Hydrocarbon (Sitkoff, D. (51) 397)

Amphotericin B
Factor analysis; Eigenspectra; Real spectra; Constraints; Absorption spectroscopy; Lauroyl sucrose; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Antibody
Antigen; Recognition; Proteins; Residues; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 337)

Antigen
Antibody; Recognition; Proteins; Residues; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 337)

Aqueous salt solutions
Thermodynamics; DRISM theory (Perkyns, J. (51) 129)

Arotinoids
Conformational analysis; Drug–receptor interaction; Geometry optimization; Rotational barriers (Bonchev, D. (51) 59)

Binding free energy
N-acetylgalactosaminuronic acid; *O*-acetylation; Potentiometric titration; Circular dichroism (Bystricky, S. (51) 1)

Cavity free energy
Hydrophobicity; Water structure; Simulation (Madan, B. (51) 279)

Charged, polar, and nonpolar atomic groups
Partial compressibility; Hydration; Globular proteins; DNA duplexes (Chalikian, T.V. (51) 89)

Circular dichroism
N-acetylgalactosaminuronic acid; *O*-acetylation; Potentiometric titration; Binding free energy (Bystricky, S. (51) 1)

Compensation
Enthalpy; Entropy; Hydrophobic; Thermodynamic (Lee, B. (51) 271)

Conformational analysis
Arotinoids; Drug–receptor interaction; Geometry optimization; Rotational barriers (Bonchev, D. (51) 59)

Constraints
Factor analysis; Eigenspectra; Real spectra; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Continuum model
Hydration; Thermodynamics (Rashin, A.A. (51) 359)

Continuum studies
Thermodynamics; Hydration (Rashin, A.A. (51) 167)

Convergence temperature
Hydration; Model peptide compounds; Protein stability (Barone, G. (51) 193)

Hydration; Entropy; Hydrogen bonding; Protein stability (Murphy, K.P. (51) 311)

Counterion binding
Plant cell wall; Polyelectrolyte; Poisson–Boltzmann cell model; Polygalacturonic acid; Nitella flexilis (Voué, M. (51) 9)

Density functional calculations
Reaction field effects; Solvation effects (Rashin, A.A. (51) 375)

Differential gel filtration
Recombinant hemoglobin; Subunit assembly (Fronticelli, C. (51) 53)

DNA double helix
Frequency domain electrooptics; Permanent/induced dipole; Phase dependence (Porschke, D. (51) 37)

DNA duplexes
Partial compressibility; Hydration; Charged, polar, and nonpolar atomic groups; Globular proteins (Chalikian, T.V. (51) 89)

DRISM theory
Thermodynamics; Aqueous salt solutions (Perkyns, J. (51) 129)

Drug–receptor interaction
Arotinoids; Conformational analysis; Geometry optimization; Rotational barriers (Bonchev, D. (51) 59)

Eigenspectra
Factor analysis; Real spectra; Constraints; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Elasticity modulus
Pentoxifylline; Model membranes; Quasi-elastic light scattering (Azize, B. (51) 45)

Electrostatics
Molecular mechanics; Solvation; Linear response theory (Figueirido, F. (51) 235)

Electrostriction
Model for ion hydration; Thermodynamic functions of hydration; Water structure making, breaking (Marcus, Y. (51) 111)

Enthalpy
Entropy; Compensation; Hydrophobic; Thermodynamic (Lee, B. (51) 271)

Entropy
Enthalpy; Compensation; Hydrophobic; Thermodynamic (Lee, B. (51) 271)

Hydration; Hydrogen bonding; Protein stability; Convergence temperature (Murphy, K.P. (51) 311)

Equilibrium dialysis
Zn(II)-serum albumin; Successive stability constants; Zn^{2+}-induced cross-linking self-association (Yongqia, Z. (51) 81)

Factor analysis
Eigenspectra; Real spectra; Constraints; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Floating polynomial force field
Molecular dynamics; Water; Interpolating electrostatic field representation (Cachau, R.E. (51) 217)

Frequency domain electrooptics
DNA double helix; Permanent/induced dipole; Phase dependence (Porschke, D. (51) 37)

Geometry optimization
Arotinoids; Conformational analysis; Drug–receptor interaction; Rotational barriers (Bonchev, D. (51) 59)

Gibbs and Helmholtz energies
Solvation; Large molecules (Ben-Naim, A. (51) 203)

Globular proteins
Partial compressibility; Hydration; Charged, polar, and nonpolar atomic groups; DNA duplexes (Chalikian, T.V. (51) 89)

Glycolysis
Oscillations; Ultrafiltering continuous flow stirred tank reactor (Hocker, C.G. (51) 21)

Hydration
Partial compressibility; Charged, polar, and nonpolar atomic groups; Globular proteins; DNA duplexes (Chalikian, T.V. (51) 89)

Thermodynamics; Continuum studies (Rashin, A.A. (51) 167)

Model peptide compounds; Protein stability; Convergence temperature (Barone, G. (51) 193)

Monte Carlo simulation; Polarization; Nucleotide bases (Gao, J. (51) 253)

Interactions; Protein; Unfolding; Thermodynamics (Makhatadze, G.I. (51) 291)

Entropy; Hydrogen bonding; Protein stability; Convergence temperature (Murphy, K.P. (51) 311)

Partial molar entropy; Solute–solvent correlation (Paulaitis, M.E. (51) 349)

Continuum model; Thermodynamics (Rashin, A.A. (51) 359)

Hydrocarbon
Solvation free energy; Surface tension; Alkane (Sitkoff, D. (51) 397)

Hydrogen bonding
Hydration; Entropy; Protein stability; Convergence temperature (Murphy, K.P. (51) 311)

Hydrophobic
Enthalpy; Entropy; Compensation; Thermodynamic (Lee, B. (51) 271)

Hydrophobicity
Volume correction; Standard state (Lee, B. (51) 263)

Water structure; Cavity free energy; Simulation (Madan, B. (51) 279)

Proteins; Residues; Accessibility (Nauchitel, V.V. (51) 327)

Antigen; Antibody; Recognition; Proteins; Residues; Accessibility (Nauchitel, V.V. (51) 337)

Interactions
Hydration; Protein; Unfolding; Thermodynamics (Makhatadze, G.I. (51) 291)

Interpolating electrostatic field representation
Molecular dynamics; Water; Floating polynomial force field (Cachau, R.E. (51) 217)

Ion pair potentials-of-mean force
Alkali halide; Water (Pratt, L.R. (51) 147)

Large molecules
Solvation; Gibbs and Helmholtz energies (Ben-Naim, A. (51) 203)

Lauroyl sucrose
Factor analysis; Eigenspectra; Real spectra; Constraints; Absorption spectroscopy; Amphotericin B; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Lennard-Jones mixtures
Thermodynamics; Ornstein–Zernike equation; Solute–solvent interactions (Schmidt, A.B. (51) 393)

Linear response theory
Molecular mechanics; Electrostatics; Solvation (Figueirido, F. (51) 235)

Model for ion hydration
Thermodynamic functions of hydration; Electrostriction; Water structure making, breaking (Marcus, Y. (51) 111)

Model membranes
Pentoxifylline; Elasticity modulus; Quasi-elastic light scattering (Azize, B. (51) 45)

Model peptide compounds
Hydration; Protein stability; Convergence temperature (Barone, G. (51) 193)

Molecular dynamics
Water; Floating polynomial force field; Interpolating electrostatic field representation (Cachau, R.E. (51) 217)

Molecular mechanics
Electrostatics; Solvation; Linear response theory (Figueirido, F. (51) 235)

Molten globule state
Proteins; Structural determinants (Freire, E. (51) 243)

Monomer
Factor analysis; Eigenspectra; Real spectra; Constraints; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Aggregation; Oligomer (Chapados, C. (51) 71)

Monte Carlo simulation
Hydration; Polarization; Nucleotide bases (Gao, J. (51) 253)

***N*-acetylgalactosaminuronic acid**
O-acetylation; Potentiometric titration; Binding free energy; Circular dichroism (Bystricky, S. (51) 1)

Nitella flexilis
Plant cell wall; Polyelectrolyte; Poisson–Boltzmann cell model; Counterion binding; Polygalacturonic acid (Voué, M. (51) 9)

Nucleotide bases
Monte Carlo simulation; Hydration; Polarization (Gao, J. (51) 253)

***O*-acetylation**
N-acetylgalactosaminuronic acid; Potentiometric titration; Binding free energy; Circular dichroism (Bystricky, S. (51) 1)

Oligomer
Factor analysis; Eigenspectra; Real spectra; Constraints; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Aggregation; Monomer (Chapados, C. (51) 71)

Ornstein–Zernike equation
Thermodynamics; Lennard-Jones mixtures; Solute–solvent interactions (Schmidt, A.B. (51) 393)

Oscillations
Glycolysis; Ultrafiltering continuous flow stirred tank reactor (Hocker, C.G. (51) 21)

Partial compressibility
Hydration; Charged, polar, and nonpolar atomic groups; Globular proteins; DNA duplexes (Chalikian, T.V. (51) 89)

Partial molar entropy
Hydration; Solute–solvent correlation (Paulaitis, M.E. (51) 349)

Pentoxifylline
Model membranes; Elasticity modulus; Quasi-elastic light scattering (Azize, B. (51) 45)

Permanent / induced dipole
DNA double helix; Frequency domain electrooptics; Phase dependence (Porschke, D. (51) 37)

Phase dependence
DNA double helix; Frequency domain electrooptics; Permanent/induced dipole (Porschke, D. (51) 37)

Plant cell wall
Polyelectrolyte; Poisson–Boltzmann cell model; Counterion binding; Polygalacturonic acid; Nitella flexilis (Voué, M. (51) 9)

Poisson–Boltzmann cell model
Plant cell wall; Polyelectrolyte; Counterion binding; Polygalacturonic acid; Nitella flexilis (Voué, M. (51) 9)

Polarization
Monte Carlo simulation; Hydration; Nucleotide bases (Gao, J. (51) 253)

Polyelectrolyte
Plant cell wall; Poisson–Boltzmann cell model; Counterion binding; Polygalacturonic acid; Nitella flexilis (Voué, M. (51) 9)

Polygalacturonic acid
Plant cell wall; Polyelectrolyte; Poisson–Boltzmann cell model; Counterion binding; Nitella flexilis (Voué, M. (51) 9)

Potentiometric titration
N-acetylgalactosaminuronic acid; *O*-acetylation; Binding free energy; Circular dichroism (Bystricky, S. (51) 1)

Protein
Hydration; Interactions; Unfolding; Thermodynamics (Makhatadze, G.I. (51) 291)

Proteins
Molten globule state; Structural determinants (Freire, E. (51) 243)

Residues; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 327)

Antigen; Antibody; Recognition; Residues; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 337)

Protein stability
Hydration; Model peptide compounds; Convergence temperature (Barone, G. (51) 193)

Hydration; Entropy; Hydrogen bonding; Convergence temperature (Murphy, K.P. (51) 311)

Quasi-elastic light scattering
Pentoxifylline; Model membranes; Elasticity modulus (Azize, B. (51) 45)

Reaction field effects
Density functional calculations; Solvation effects (Rashin, A.A. (51) 375)

Real spectra
Factor analysis; Eigenspectra; Constraints; Absorption spectroscopy; Amphotericin B; Lauroyl sucrose; Aggregation; Monomer; Oligomer (Chapados, C. (51) 71)

Recognition
Antigen; Antibody; Proteins; Residues; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 337)

Recombinant hemoglobin
Subunit assembly; Differential gel filtration (Fronticelli, C. (51) 53)

Residues
Proteins; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 327)

Antigen; Antibody; Recognition; Proteins; Accessibility; Hydrophobicity (Nauchitel, V.V. (51) 337)

Rotational barriers
Arotinoids; Conformational analysis; Drug–receptor interaction; Geometry optimization (Bonchev, D. (51) 59)

Simulation
Hydrophobicity; Water structure; Cavity free energy (Madan, B. (51) 279)

Solute–solvent correlation
Partial molar entropy; Hydration (Paulaitis, M.E. (51) 349)

Solute–solvent interactions
Thermodynamics; Ornstein–Zernike equation; Lennard-Jones mixtures (Schmidt, A.B. (51) 393)

Solvation
Large molecules; Gibbs and Helmholtz energies (Ben-Naim, A. (51) 203)

Molecular mechanics; Electrostatics; Linear response theory (Figueirido, F. (51) 235)

Solvation effects
Reaction field effects; Density functional calculations (Rashin, A.A. (51) 375)

Solvation free energy
Surface tension; Hydrocarbon; Alkane (Sitkoff, D. (51) 397)

Standard state
Volume correction; Hydrophobicity (Lee, B. (51) 263)

Structural determinants
Molten globule state; Proteins (Freire, E. (51) 243)

Subunit assembly
Recombinant hemoglobin; Differential gel filtration (Fronticelli, C. (51) 53)

Successive stability constants
Zn(II)-serum albumin; Equilibrium dialysis; Zn^{2+}-induced cross-linking self-association (Yongqia, Z. (51) 81)

Surface tension
Solvation free energy; Hydrocarbon; Alkane (Sitkoff, D. (51) 397)

Thermodynamic
Enthalpy; Entropy; Compensation; Hydrophobic (Lee, B. (51) 271)

Thermodynamic functions of hydration
Model for ion hydration; Electrostriction; Water structure making, breaking (Marcus, Y. (51) 111)

Thermodynamics
Aqueous salt solutions; DRISM theory (Perkyns, J. (51) 129)

Hydration; Continuum studies (Rashin, A.A. (51) 167)

Hydration; Interactions; Protein; Unfolding (Makhatadze, G.I. (51) 291)

Hydration; Continuum model (Rashin, A.A. (51) 359)

Ornstein–Zernike equation; Lennard-Jones mixtures; Solute–solvent interactions (Schmidt, A.B. (51) 393)

Ultrafiltering continuous flow stirred tank reactor
Glycolysis; Oscillations (Hocker, C.G. (51) 21)

Unfolding
Hydration; Interactions; Protein; Thermodynamics (Makhatadze, G.I. (51) 291)

Volume correction
Standard state; Hydrophobicity (Lee, B. (51) 263)

Water
Ion pair potentials-of-mean force; Alkali halide (Pratt, L.R. (51) 147)

Molecular dynamics; Floating polynomial force field; Interpolating electrostatic field representation (Cachau, R.E. (51) 217)

Water structure
Hydrophobicity; Cavity free energy; Simulation (Madan, B. (51) 279)

Water structure making, breaking
Model for ion hydration; Thermodynamic functions of hydration; Electrostriction (Marcus, Y. (51) 111)

Zn(II)-serum albumin
Equilibrium dialysis; Successive stability constants; Zn^{2+}-induced cross-linking self-association (Yongqia, Z. (51) 81)

Zn^{2+}-induced cross-linking self-association
Zn(II)-serum albumin; Equilibrium dialysis; Successive stability constants (Yongqia, Z. (51) 81)
